

Good connections pay back

CBRE, JLL and Knight Frank all list poor mobile connectivity or 'dead zones' as a deal-breaker in negotiations. Mobile connectivity is no longer a nice-to-have, it's a must.

TOP THREE Digital connectivity is a top three consideration for landlords (Knight Frank)

84% of tenants would pay more for a building with better connectivity (WiredScore)

77% of tenants would sign a longer lease in a building with superior connectivity (Cluttons)

89% of occupiers say mobile signal is a top priority, because dropped bars mean missed opportunities (WiredScore)

72% of landlords have reduced void periods with improved connectivity (Cluttons)

Tenants expect assured mobile signal

All mobile network operators

All areas of the building

No capacity issues

Supporting smart building applications

Connecting the City of London's tallest skyscraper

We collaborated closely with 22 Bishopsgate to design an innovative, technical and commercial solution, that provides assured connectivity for landlord and tenants alike.

“

Mobile connectivity is an essential part of our smart building vision. Freshwave's project management, program installation and commissioning has been seamless from start to finish and done to an exceedingly high standard.”

Peter Bicknell, Head of Engineering

Smart buildings start with smart connectivity

Modern materials block mobile signal

Materials used in modern construction prevent the outdoor signal from penetrating within. This creates a patchwork of 'not-spots', or leaves entire areas without mobile signal.

Your own dedicated, all operator network

Our solution works independently from the outdoor macro network - providing wall-to-wall coverage, designed and built just for you.

Connect now, pay later

With our innovative Pay as-you-occupy model, we can install coverage across the building (including common areas, basements and lifts) and charge tenants directly as they take up the space.

£4.1 BILLION

Yearly productivity gains from better indoor mobile coverage. Discover more in our Mobile Connectivity ROI Index 2025.

Top three benefits mobile connectivity brings to tenants

Our Mobile Connectivity ROI Index 2025 shows broad benefits from mobile connectivity
